HISTORICAL SIGNIFICANCE

The former Lake Street Fire Hall is one of the oldest remnant fire halls extant in the City of St. Catharines. It was opened on December 15, 1913 by Mayor Dr. William H. Merritt and presented to the Fire Department. With amalgamation in 1961, the fire hall closed in order to allow a larger, more modern facility to be built. It is interesting to notice that the building was constructed to accommodate a horse drawn hosewagon (illustrated in the frieze on the facade), but by 1920 a four-cylinder Reo fire truck was being used. The Reo fire truck was built in St. Catharines.

ARCHITECTURAL SIGNIFICANCE

The former Lake Street fire hall was constructed of steel and masonry in the Neo Tudor Style. The architect was Thomas H. Wiley, whose work is considered important locally. Architectural features include: a traditional red brick facade laid in Flemish bond pattern; elaborate decorative painted wood cornice and frieze; original wood windows; decorative, rare circle muntin bars in windows; original stone fire hall signs over two doors; stone carving set in entablature over main door showing fire carriage being pulled by horses; stone plaques set in masonry showing fire fighting crest.

CONTEXTUAL SIGNIFICANCE

The building is considered an important landmark in the neighbourhood and a visual 'anchor' at this corner.
