SCHEDULE "A"
REASONS FOR DESIGNATION
(STATEMENT OF SIGNIFICANCE)

Description

The property at 30 Powerhouse Street is worthy of designation under Part IV, Section 29 of the Ontario Heritage Act for its cultural heritage value, and meets the criteria for municipal designation prescribed by the Province of Ontario under the three categories of design, associative and contextual values. Located on the northeast corner of Powerhouse Street and Foundry Avenue, the Canada Foundry Company Office Building (1902) is a four-storey industrial building. The site was listed on the City of Toronto Inventory of Heritage Properties in 2004.

Statement of Cultural Heritage Value

The Canada Foundry Company Office Building has design value as a representative example of an early 20th century industrial building that forms part of a surviving collection of structures associated with the manufacturing site.

The Office Building is associated with the Canada Foundry Company, a subsidiary of the Canadian General Electric Company, which constructed the building on its 60-acre (25-hectare) tract to manufacture a range of steel and cast iron products, including steam locomotives, railway tracks and turntables, bridge components, elevator cages, fences, staircases and architectural ornaments. Known as the Davenport works, CGE produced electrical transformers on the site for nearly 60 years.

Contextually, the Canada Foundry Company Office Building is historically and visually related to its surroundings where, with the adjoining Canada Foundry Company Warehouse and Powerhouse, it is a surviving example of the industrial complex that filled the area southwest of Davenport Road and Lansdowne Avenue for most of the 20th century.

Heritage Attributes

The heritage attributes of the property at 30 Powerhouse Street are:

- The four-storey office building
- The scale, form and massing of the structure with its rectangular-shaped plan
- The materials, with brick cladding and detailing
- The flat roofline that is decorated with corbelled brickwork
- The brick piers that symmetrically organize the segmental-arched window openings with voussoirs and sills
