OF THE

CORPORATION OF THE CITY OF CAMBRIDGE

ALL AND SINGULAR that certain parcel or tract of land and premises, situate, lying and being in the City of Cambridge, in the Regional Municipality of Waterloo and Province of Ontario, formerly in the Town of Hespeler, and being composed of Lot 8, on the north side of Spring Street, (formerly Church Avenue), on Plan Number 151.

## SCHEDULE "B"

TO BY-LAW NO. 252 - 86

OF THE

CORPORATION OF THE CITY OF CAMBRIDGE

### HISTORICAL

The Georgian Townhouses, formerly referred to as Riverside Terrace, were constructed circa 1862 by Jacob Hespeler. The two storey building was intended to house workers from his nearby mill complex.

The Italianate building on the west end served as Hespeler's first Town Hall and was originally the engine house for the Volunteer Fire Brigade. It was initially constructed as a separate building but was joined to the rowhouses sometime after 1905.

### ARCHITECTURAL

Riverside Terrace, is a two-storey vernacular Georgian building in heavily mortared limestone rubblestone with dressed limestone voussoirs and quoins. There are 24 bays of flat-headed openings on both the Spring Street and river facades. The original 6/6 double sash windows are present on the Spring Street facade. Doorways on both facades have three paned transoms and, on the river side, panelled doors and dressed limestone sills. A round-arched window, now boarded up is present on the western end at second storey level. The side-gabled roof has bracketed, wooden cornice with wide eaves return.

The first Hespeler Town Hall is an Italianate public building of ashlar limestone, now linked to the Riverside Terrace. The Town Hall is distinguished by tall round-arched windows with quarry-faced voussoirs and quoins, some with original double sash. The river facade has an off-centre entrance with round-arched opening, a central bay window and an round-arched window at first-storey level. There are three round-arched windows above, one with original shutters, and a half-circle window with original sash in the gable peak.

A more detailed description of the architectural features of the building can be found in the L.A.C.A.C. Building Description for this property.

### REASONS FOR DESIGNATION

The properties located at 65-79 (Riverside Terrace) and 61-63 Spring Street (first Hespeler Town Hall) are being recommended for designation on architectural and historical grounds. The reasons, which relate to the City of Cambridge Official Plan, are as follows:

#### a) Historical Significance:

- i) The buildings date from an early period in the development of one of the city's communities.
- ii) They are well preserved examples and illustrations of the city's social, cultural, political, economic and technological development history.
- iii) They are associated with a person who is recognized as having made a significant contribution to the city's development and who influenced the course of local history.

#### b) Architectural Significance:

- i) They are a well preserved and representative example of their architectural style and period of building.
- ii) They make an important contribution to the urban composition and the streetscape of which they form a part.
- iii) They are generally recognized as important city landmarks.
