## Schedule A

### Reasons for Designation

#### Description of Property

The property is located in the City of Port Colborne, in the Regional Municipality of Niagara and is legally described as Part Lot 18 Concession 3, former Humberstone Township. It is municipally known as 2703 Chippawa Road. The site is known as the "Julia Yager Community Centre" and will be designated as "Humberstone School No. 6".

#### Statement of Cultural Heritage Value or Interest

As a property housing an educational institution, this site has a history of 168 years, during which it has housed three different Bethel Schools. The first existed from 1848 – 1866, the second existed from 1866 – 1915, and the third was built in 1915 and is the structure currently present at this site.

The current structure dates back to one of the oldest schools still in existence in what is now called Port Colborne and sits on the site of possibly the first school in this area. Consequently, the property has historical value or associative value because it has direct associations with institutions that have had significance to our community and the property yields information that contributes to an understanding of our community.

The style of this school is an example of the early 1900 style schools – "one room" red brick schoolhouses - and may contain some of the bricks used in the previous school structure, which dates back to 1866. Hence, the property has design value because it is a rare, unique, representative or early example of a style, type, expression, material or construction method and it displays a high degree of craftsmanship or artistic merit.

This building, being located at a visually dominant position at the intersection of two historic and old traveled roads, forms an important feature on what may be classified as a "cultural heritage landscape". The property therefore has contextual value because it is important in defining and supporting the character of the area, is physically and functionally linked to its surroundings, and is a landmark. Furthermore, many of the original city founders would have been educated at this site.

#### Description of Heritage Attributes

The exterior westerly portion of the structure constructed in 1915 constructed of red brick which has remained relatively unchanged and many of the unique features are still present. For example, the front elevation of the building, facing west onto Chippawa Road, contains a symmetrically balanced facade with two windows flanking either side of the main entrance. Also, the front entry contains a covered porch or "portico", with tapered square wooden columns or pillars resting upon stone foundation piers. The hipped roof at the front of the structure is broken by a "gable" containing a half-moon window. The front wall also contains a "date stone" between the two windows, which bears the inscription "1915 AD". Finally, the front of the building is visually dominated by the "louvered belfry", while the chimney stack is located at the rear of the structure.
