Description

Located on the North side of King Road, East of Jane Street, the building is known municipally as the King Christian Church, 2920 King Road, in the Township of King and is approximately 1 hectare in size.

Statement of Cultural Heritage Value or Interest

The King Christian Church located at 2920 King Road has historical/associative value, design/physical value and contextual value.

Historical/Associative Value

The structure's historical/associative value lies in its early establishment as an early church in King Township. The King Christian Church was built on Lot 31, Concession 5 (now Jane Street) in King Township (just outside Kettleby). The land had been purchased in 1850 for 17 pounds and 10 shillings from Thomas Ramsden.

The first trustees were three local men with Quaker backgrounds, John Tatton, Martin Bogart, and William Hilbourn. Over the next 80 year the church thrived as members held an annual Strawberry Supper in the spring and a Fowl Supper in the fall. On the first Sunday of the July was a "Grove Meeting" during which members would gather in Ramsden's Orchard adjoining the church to listen to a speaker, and on the last Saturday of each month host "Monthly Meetings" for an hour of "fellowship, prayer, and testimony."

By 1931 the congregation of the church had reduced and those remaining were no longer able to maintain the building, and on December 17 it was sold to the Emanuel Baptist Church. The Baptist Church saw the addition of the platform and altar at the front, the pews, and the organ. However; by 1978 the Baptist Church congregation had reduced as well and the building was given to the Township of King under the care of the King Township Historical Society (KTHS) by the request of the last congregante, Edna Little (1914-1978).

In 1982 the church was lifted onto a flatbed truck and moved to the King Township Museum site at 2920 King Road where the King Township Historical Society would be better able to care for it. In 2000 the care and operations of the property were transferred to the Township of King.

Design/Physical Value

The King Christian Church at 2920 King Road is a representative example of the Loyalist Cottage style and as an early representative of a rural church building. The simple rectangular and mirrored design of the Church is represented by the one storey elevation with an attached vestibule. Both the vestibule and the main church building feature gable roofs. The attached vestibule has a transom window over the wooden door, finial in the gable roof and, gingerbread bargeboard trim on its roof line. The building is symmetrical

in a geometric shape and has wooden ship-lap board cladding on its exterior walls. The six (6) double hung windows with 3 on each of the east and west elevations of the building with single sash in a 12 by 12 glass pane configuration. The design of the Church is representative of the small scale rural church buildings found throughout Ontario which were built to meet the needs of the local population. They were significant to the community in the 19th century and help to contribute to our understanding of how the building functioned as an early spiritual gathering place for many in the community.

Contextual Value

The structure has contextual value as the church contributes to the nineteenth century historic character of the King Heritage & Cultural Centre. Although relocated from its original site, it now sits among other 19th century community buildings which were relocated to the property such as the King Train Station, the Woman's Laskay Hall and the Kinghorn School (School Section 23). Today these buildings are used to educate on King's early history.
