**SCHEDULE 'A' to BY-LAW NO. 28-2003**

**ALL AND SINGULAR that certain parcel or tract of land and premises situate, lying and being on the north side of 15 Side Road, in the Town of Milton, Regional Municipality of Halton more particularly described as Lot 16, Concession 4, in the Town of Milton, Regional Municipality of Halton.**

## SCHEDULE 'B' to BY-LAW NO. 28-2003

The Nassagaweya Presbyterian Stone Church (3097 15 Side Road) is recommended for designation due to heritage attributes of the property with cultural heritage value and interest.

In 1861, the stone church at Sodom, referred to as Nassagaweya Church (presently called Nassagaweya Presbyterian Church) was built on the north side of No 15 Side Road, on Lot 16 Concession 4. The church is located on the former site of the first Presbyterian Church in Nassagaweya, which was originally built in 1836. As the only remaining original stone church in Nassagaweya, this building should be considered to be a cultural heritage landmark of special value.

The exterior of the building is to be designated as it exists at the date of designation. The heritage attributes to be included in the designation include the size and locations of window openings, the windows in those openings, the main entrance doors, frame and cap, the wall surfaces and stone lintels.

The church is a simple gabled structure in a vernacular Georgian style. The principal elevation is the south gable. This elevation consists of four windows organized in a stepped pattern around the main entrance and centered on a carved date stone above the doors. The side walls are divided into 3 bays by tall, wood framed windows terminating in semi-circular arches. A wood framed structure similar to the church in shape, but smaller in scale extends from the north gable wall of the building.

The walls of the church are constructed using roughly squared local stone in a broken course pattern. The coursing pattern is emphasized by the use of beaded mortar joints. The stonework at the building corners and around openings is tooled and squared. Massive stone lintels with tooled faces are used over the rectangular windows while the arched windows are spanned with carefully shaped and tooled stones.

All of the windows are constructed using wood frames with stained glass installed in wood sashes. The windows on the entrance gable are arched openings in rectangular sash.

The main entrance consists of double doors and transom set in a heavily moulded wood frame and capped with a simple wooden architrave.

The heritage attributes of the interior of the building to be part of the designation include the original chancel area, 80-seat gallery (installed through an 1895 addition), and the original white ash pews located in the sanctuary and balcony (installed in 1908).
