SCHEDULE "B"

REASONS FOR THE DESIGNATION OF THE TOWN HALL, 60 MAIN STREET, DUNDAS.

Of the few remaining early town halls and public buildings in Ontario, the Dundas Town Hall is perhaps the most appealing architecturally of the modest-sized buildings.

On an island site and exposed to view from all sides, the design suggests a symmetrical treatment of the pseudo-classic fashion of the time, in the 1840's. Nothing more fitting than the Roman Temple prototype could fulfill the aesthetic requirements and plan. In this case denuded of the orthodox portico ends, to no detriment, more practical porches were incorporated that no longer exist. Their replacement is one of the few changes made to the exterior of the original building.

The simple and effective treatment of the facades is what is distinguished. Fenestration is strongly emphasized by the bold pilasters and horizontal belt course that subtly divides the wall surface into compartments proportionate to the whole, this achieving unity without which the design would possess little merit.

In most cases when towns flourished and expansion was needed, the early town halls were demolished and replaced. The Dundas Town Hall, however, has been spared this fate and indeed has not suffered from the recent addition. Rather than disturb the existing completely finished composition, a wing has been attached in an inconspicuous contemporary manner with matching masonry that in no way conflicts with the old building, a remarkably successful solution, moreso because of the very restricted space upon which to build.

The entrance to the southerly end of the Dundas Town Hall is of course an alteration of recent years. It is not incompatible with the building but then it is not quite attuned to the simplicity of detail of the building. The stone appears to be Indiana instead of the local limestone and the feeling is one of Baroque Italian extraction without deference to the old building and displaying a broken pediment, rusticated pilasters and urn embellishments more

associated with the Edwardian period. Also there is a refinement in scale that does not conform to the boldness of the masonry of the building.

The interior comprises a second floor hall of majestic proportions in the grand manner of the British Classic Revival Style. The dignity and splendour of such rooms are dependent on the lofty ceilings, with the appropriate appurtenances, chandeliers, orders of architecture, regardless what form the decoration favours. Such grandeur can never be attained with the low ceilings of modern practice, nor in dimly lighted conditions. This room recently restored is impressive, and only in a few of some of the larger examples in Canada have they been preserved.

It must be of considerable satisfaction to the Dundas municipality to have accomplished the restoration and to have made good the continued use of this distinguished building.
