December 17, 1991

360 St. James Street
London, ON N6A 1X7

I hereby certify that the Municipal Council, at its session held on December 16, 1991 resolved:

20. That, on the recommendation of the Local Architectural Conservation Advisory Committee, notice of Council's intention to designate the property at **360 St. James Street** to be of architectural value or interest **BE GIVEN** for the following reasons under the provisions of Section 29(3) of the Ontario Heritage Act, Chapter 337. The owners concurred in the above recommendation on the understanding that the land to be included in the designation will be as shown on the assessment roll.

Architectural Reasons

The one storey cottage at **360 St. James Street** is a hipped roof, frame structure with a central peaked gable, with a side hall plan, built c.1890. The building's most outstanding feature is the full length, shed verandah with its very delicate fretwork, brackets, spindles and posts. The porch is very successful in its harmonious composition and relationship to the house. The original tongue and groove siding has been covered with stucco. The central gable has a decorative bargeboard and a small square window. All windows feature decorative wood mouldings and wood sills. The original front door and frame probably matched the one on its sister house at 364 St. James Street. The original roof material was wood shingle.
