BY-LAW NO. 10-1990

SCHEDULE "A"

SHORT STATEMENT OF REASONS FOR THE PROPOSED DESIGNATION

This building is a fine example of the Italianate style of architecture, and enhances Little Bridge Street. It was constructed some time between 1883 and 1886. Considering its small scale, the architect incorporated with skill such features as arched windows with squared and rounded heads, large eave brackets, a verandah, and a variation in setback. The foundation is of rough-cut white limestone, and the walls of red brick laid in stretcher bond. The brickwork at the windowheads reveals a high level of craftsmanship.
