

# SQUARE PLAN

1

3

2

This radial plan is square in shape, based on a central, bi-symmetrical composition rather than an axial plan. Often, square plans take the form of a cross-in-square plan, which is usually composed of a square space with a Greek Cross within it. The central portion is often larger than the arms of the cross and is often capped by a dome. Examples: 1. Sharon Temple (Sharon), 2. St. Matthew the Apostle Anglican Church (North York), 3. St. Boniface Roman Catholic Church (Hamilton), 4. Santa Maria Romanian Orthodox Church (Timmins)
